APS Newsletter Series 2.7

The Environment

APS is committed to reducing toxic waste and so we're pleased to announce that in 2009 we are expanding our services to include more environmentally friendly options for your office. By participating in the services listed below your office will be making a valuable contribution to decreasing the amount of toxic waste sent to landfill.

Purchasing a New Printer – Environmental Impact

Did you know that some printers produce less ozone emissions than others, or that some colour printer toners use soy based dyes reducing your exposure to toxic chemicals? Some manufacturers are actively working towards reducing the number of toxic chemicals in printers thereby making them better for the environment. Check out the Sales section on our web page or call for more information.

Recycle Programme – Spare Parts Disposal

We do our best to ensure all spare parts disposed by Australian Printer Services Pty Ltd are fully recycled so no parts of your printer go towards landfill.

Cartridge Disposal – Cartridge Recycling Bins

Australian Printer Services Pty Ltd has disposal bins for the recycling of printer or copier cartridges at our office. We are using the Kyocollect programme for Kyocera consumables and for all other brands we use "Cartridges 4 Planet Ark". Talk to us about organising a recycle bin to be delivered to your office.

Printer Disposal – Take Back and Recycle Programme

We can dispose of your printers responsibly and if you request we can provide certification of the recycling process having been completed. Talk to us about how we can dispose of your unwanted printer.

Manufacturer Price Increases

For those of you that are not aware most manufacturers have increased their prices on printers, parts and consumables. However as we have negotiated some great deals with our suppliers our pricing remains very competitive, so talk to us first as not only are our prices excellent but we have the best technical advice ensuring that you buy the right product for your needs. You can also visit the FAQ section on our web page for added information on buying the correct toners for your printers.

Service Calls

One thing that has not changed are our service call charges. As we charge for our time and not the number of printers we service it may even be cheaper for you to book us in to look at several printers at the same time. Our technicians are fully trained by the manufacturer and our work is guaranteed. We save you time and money in keeping your printer running in peak condition.

Get it right first time
with quality advice.

Always use **Genuine Toner** for optimum printer performance

Save with our Low Prices and orders over \$200 will receive **free** freight.

Bargain
