## *APS* Newsletter Series 3-0

### Christmas Break

Christmas time again and we will be **closing for business at 12.00pm on Thursday the 24<sup>th</sup> of December 2009 and reopening at 9.00am Monday the 18<sup>th</sup> of January 2010**. So please get in early and check the cupboards to make sure you have enough toner to last through the Christmas period.

**Please take note the week prior to Christmas there will be long delays with the courier services. Toner orders must be in early.**

### What is copier paper?

Paper designed to be used in a photocopier or laser printer, which is able to pass through a fixing process which exceeds temperatures well above 100 degrees. Hence this paper must contain low moisture content otherwise distortion, creasing or poor print may occur. Good quality copier paper will come in a wax sealing so as to limit the amount of moisture that the paper is exposed too. It is important when not using the paper for a while to keep it wrapped up in its packaging to help keep out moisture.

### Recycled paper?

When recycled paper first came onto the market it was grainy, off white in colour and had a shorter life. Recycled paper has come a long way since then. Today recycled paper is just as usable as virgin paper and meets all of the requirements for day to day home and office use. In fact, manufacturers even guarantee recycled paper across the full range of office functions.

### Business Investment Allowance – Time running out

- Small businesses (turnover less than \$2 million) must buy the asset between 13 December 2008 and 31 December 2009 and have it installed before 31 December 2010 to qualify for 50% tax break.
